@achen
Languages

French : Native

English : C1 - Fluent

Mandarin : B1 - Intermediate

Japanese : A2 - Basic

Programming

Data Science

Python, R, SQL, Julia

ML Frameworks

TensorFlow, PyTorch, scikit-learn

Tools

Git, Docker, Jupyter, Quarto

Cloud

AWS, GCP, Azure ML

22/07/1998

Research Interests

- AI & Ethics
- Fairness in ML
- Bias mitigation
- Computer Vision
- Object detection
- Image classification
- Time Series
- Forecasting
- Anomaly detection

Certifications

- AWS Certified Machine Learning --- Specialty
- Google Cloud Professional Data Engineer
- Deep Learning Specialization (Coursera)

ML Research Engineer • Data Scientist

Passionate about building fair and interpretable machine learning systems. Expertise in deep learning, computer vision, and time series forecasting. Seeking opportunities to work on high-impact problems in AI ethics and responsible AI.

Technical Projects & Publications

2024 | Fair Vision: Bias Detection in Computer Vision Models

Published in IEEE CVPR Workshop 2024

Developed interpretable framework for detecting and mitigating gender/age bias in facial recognition systems across different demographic groups.

IEEE CVPR Workshop, Vancouver

2023 | TimeNet: Temporal Attention for Long-Sequence Forecasting

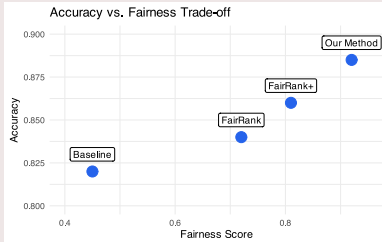

Open-source library — github.com/achen/timenet

Implemented attention-based architecture for multi-step time series forecasting. Outperformed state-of-the-art baselines (MAPE: 8.2% vs. 12.1%). 1200+ GitHub stars, active community contributions.

GitHub, Open Source

Research Visualizations: Multi-Column Layout

Model Performance Comparison

Training Curves: Loss Over Time

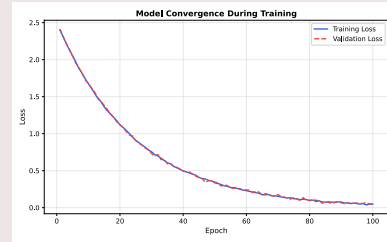

Figure 1: Cars

Additional Information

Awards & Honors

- Prix de l'Excellence en IA (Institut Polytechnique, 2024)
- Google Cloud Challenge Winner (2023)
- Coursera Deep Learning Specialization with Distinction

Table 1: Second Table

Certification	Year
AWS ML Specialty	2024
GCP Data Engineer	2023
Deep Learning	2022

Pro Tip

Last updated: 2026-05-01

Use custom per-section fonts with `text-font` and `title-font` to create visual hierarchy in your sidebar! See table → Table 1
