

Marie Dupont

Data Scientist • ML Engineer

Seeking a data science position where I can apply statistical modelling and machine-learning expertise to build impactful data products in a collaborative environment.

Contact

- +33 6 12 34 56 78
- marie.dupont@example.com
- Paris, France
- 15/03/1995
- French
- Driving License B
- @marie-dupont
- @mdupont

Languages

- French : Native
- English : C1 --- Fluent
- Spanish : B2 --- Intermediate

IT Skills

- Languages
 - Python, R, SQL, JavaScript
- ML / Data
 - scikit-learn, XGBoost, MLflow
- Tools
 - Git, Docker, VS Code, Quarto
- Cloud
 - Azure ML, GCP BigQuery

Strengths

- Analytical mindset
- Team collaboration
- Fast learner
- Written communication

Education

- 2021 – 2023 | MSc Data Science & Artificial Intelligence**
École Polytechnique, Paris | Valedictorian — mention Très Bien
Coursework: statistical learning, deep learning, NLP, causal inference, distributed computing.
- 2018 – 2021 | BSc Mathematics & Computer Science**
Université Paris-Saclay | Ranked 3rd / 120
Strong foundation in probability, linear algebra, algorithms and software engineering.

Professional Experience

- Jan. 2024 – Present | Data Scientist**
BNP Paribas, Paris
Developed an end-to-end ML pipeline for credit-risk scoring (XGBoost + SHAP explainability), reducing false-positive rate by 18 %. Tech stack: Python, MLflow, Azure ML, SQL Server.
- Apr. 2023 – Dec. 2023 | ML Research Intern**
INRIA – TAU Team, Saclay
Investigated fairness in ranking algorithms for job-search platforms (project **Fair-Rank**). Published results at ECML-PKDD 2023 workshop.
- Jun. 2022 – Aug. 2022 | Data Engineering Intern**
Criteo, Paris
Built real-time feature pipelines with Apache Kafka and Spark Structured Streaming. Reduced daily batch latency by 35 %.
- 2021 | Volunteer Data Analyst**
Médecins Sans Frontières, remote
Cleaned and visualised epidemiological datasets to support field reporting.

Projects & Publications

- 2023 | FairRank — Fairness-aware Learning-to-Rank**
ECML-PKDD 2023 workshop paper
Proposed a post-processing re-ranking algorithm that reduces demographic bias while preserving NDCG@10 within 2 % of the unconstrained baseline.
- 2022 | OpenCV Sudoku Solver**
Personal project — github.com/mdupont/sudoku-solver
Real-time Sudoku detection and solving pipeline using OpenCV and a CNN digit classifier (99.1 % accuracy on MNIST).
